To search for a drug name within this document, use the **Control** and **F** keys on your keyboard (**Command** and **F** on a Mac) or go to the **Edit** drop-down menu and select **Find/Search**. Type in the word or phrase you are looking for and click on **Search**.

Blue Cross and Blue Shield of Nebraska is an independent licensee of the Blue Cross Blue Shield Association. Prime Therapeutics LLC is an independent company providing pharmacy benefit management services.

## Introduction

The attached Blue Cross and Blue Shield of Nebraska (BCBSNE) NetResults Balanced shows covered drugs for a broad range of diseases.

Generic drugs are shown in lowercase **boldface** type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand.

Brand prescription drugs are shown in CAPITAL letters followed by the generic name.

The BCBSNE PDL is organized into broad categories (e.g., anti-infective drugs). Within most categories, drugs are sub-grouped by drug class (e.g., penicillins) or by use for a specific medical condition (e.g., diabetes).

Members are encouraged to show this list to their physicians and pharmacists. Physicians are encouraged to prescribe drugs on this list, when right for the member. However, decisions regarding therapy and treatment are always between members and their physician.

For a more complete listing of medication coverage and costs, you may visit [NebraskaBlue.com](http://NebraskaBlue.com). Please refer to your member guide for detailed information regarding your pharmacy benefits, including your benefit design, out-of-pocket costs, prior review and restricted access medication requests and applicable exclusions. You may also call the number on the back of your member ID card.

## How Drugs are Selected for Coverage and Tier Placement

Covered drugs on this list are selected and placed into tiers (refer to Member Prescription Benefit section) based on the recommendations of a Pharmacy and Therapeutics (P&T) Committee made up of physicians and pharmacists from throughout the country. The committee, which includes at least one representative from the health insurer or claims administrator of your health plan, reviews prescription drugs regulated by the U.S. Food and Drug Administration (FDA) based on safety, efficacy and uniqueness. Once drugs are deemed appropriate for coverage and safety and efficacy have been evaluated, cost may be considered to determine final tier placement and coverage requirements.

Drugs are reviewed by the P&T Committee when newly approved by the FDA and at least annually after initial review. Drug coverage is subject to change at any time but the drug list will be updated quarterly. There are many reasons why drug coverage or tier placement may change. Examples include:

- The tier level of a medication included on the medication list may increase (change to a higher tier or non-covered) when an FDA-approved bioequivalent generic medication becomes available
- Change in the cost of the medication and/or in the classification of the medication by the FDA or nationally recognized medication databases (e.g., Medispan)

## Coverage Considerations

Coverage is limited to prescription drugs approved by the FDA as evidenced by a New Drug Application (NDA), Abbreviated New Drug Application (ANDA) or Biologics License Application (BLA) on file. Any legal requirements or group-specific benefits for coverage will supersede this (e.g., preventive drugs per the Affordable Care Act).

Newly marketed prescription drugs will not be covered until the P&T Committee has had an opportunity to review the drug to determine whether the drug will be covered and, if so, which tier will apply based on safety, efficacy and the availability of other products within that class of drugs. If your physician feels that a new drug is medically necessary prior to P&T Committee evaluation, an exception request for coverage may be submitted.

## Prescription Drug List Tiers

Tier placement of prescription medications in the NetResults Balanced may be determined by the effectiveness and safety of the medication, the cost of the medication, and /or the classification of the medications by the FDA or nationally recognized medication databases (e.g., Medispan). The plan design determines the member's payment obligation.

Here is one example of the six-tiered benefit structure (this is one example of the prescription drug list tiers available – other tier structures exist):

- **Tier 1:** Preferred Generics
- **Tier 2:** Non-preferred Generics
- **Tier 3:** Preferred Brands
- **Tier 4:** Non-preferred Brands
- **Tier 5:** Preferred Specialty
- **Tier 6:** Non-preferred Specialty

Note: Drugs that are not covered will be noted in the PDL with the NC (not covered) indicator. Depending on your benefit plan, drugs can either be in these tiers or you may have fewer tiers (e.g., all generics in one tier). To verify your payment amount for a drug, log in to myNebraskaBlue.com or call the number on the back of your member ID card.

## Generic Medications

In most cases, choosing a generic medication equivalent, when available, will mean significant savings to you. We encourage you to discuss with your physician whether a generic alternative is available as these medications represent safe, effective treatment options. Especially in the case of medications that are taken daily and refilled frequently, you will experience the long-term savings of a lower medication payment month after month. If you choose a brand-name prescription medication and a generic equivalent is available, you may be subject to a reduced benefit and a higher out-of-pocket expense.

## How Member Payment is Determined

Generally, each prescription drug product is placed into one of up to six member payment tiers: Preferred Generic (Tier 1), Non-preferred Generic (Tier 2), Preferred Brand (Tier 3), Non-preferred Brand (Tier 4), Preferred Specialty (Tier 5) and Non-preferred Specialty (Tier 6).

**Your pharmacy benefit includes coverage for many prescription drugs, although some exclusions may apply.** For example, drugs indicated for cosmetic purposes, such as Propecia, for hair growth, may not be covered. Drugs that have not received FDA approval are not covered. Prescription products that have over-the-counter (OTC) equivalents may not be covered. Drugs that are not FDA-approved for self-administration may be available through your medical benefit.

## Coverage Considerations

Most prescription drug benefit plans provide coverage for up to a 30-day supply of medication, with some exceptions. Your plan may also provide coverage for up to a 90-day supply of maintenance medications. Maintenance medications are those drugs you may take on an ongoing basis for conditions such as high blood pressure, diabetes or high cholesterol. Some plans may exclude coverage for certain agents or drug categories, like those used for erectile dysfunction or weight loss.

**Specialty Drugs:** Some BCBSNE groups offer specific benefits for specialty drug products. Please refer to your Certificate of Coverage and/or Schedule of Benefits to determine the specific quantities allowed under your group's benefit. Specialty products are typically injectable drugs that can be self administered by a patient or family member and are used to treat serious or chronic medical conditions such as multiple sclerosis, hemophilia, hepatitis and rheumatoid arthritis.

**Affordable Care Act:** Some medications may have limited or \$0 cost-sharing under the Affordable Care Act (ACA). Examples of categories of medications that may be subject to limited or \$0 cost share include aspirin, breast cancer preventive, fluoride supplements, folic acid supplements, iron supplements, tobacco cessation, vaccines, vitamin D supplements and some contraceptive medications and devices.

For a complete listing of products covered at \$0, please refer to the NetResults Preventative Drug List

**Over-the-counter (OTC) exclusions:** Your benefit plan may not provide coverage for prescription medications that have an OTC version. You should refer to your benefit plan material for details about your particular benefits.

**Compounded medications:** Your benefit plan may not provide coverage for compounded medications. Please see your plan materials or call the number on the back of your member ID card to determine whether compounded medications are covered and/or to verify your payment amount.

Drugs that have not received FDA approval are not covered.

## Utilization Management

**Preauthorization (PA):** Your benefit plan may require preauthorization for certain drugs. This means that your doctor will need to submit a preauthorization request for coverage of these medications, and the request will need to be approved before the medication will be covered under your plan. For the medications listed in this document, if a preauthorization is commonly required, it will generally be noted next to the medication with a dot under the preauthorization column. Some plans may have preauthorization on additional medications beyond those noted in this document. Refer to your benefit plan materials for details about your particular benefits.

**Step Therapy (ST):** Your benefit plan may include a step therapy program. This means you may need to try another proven, cost-effective medication before coverage may be available for the drug included in the program. Many brand drugs have less expensive generic or brand alternatives that might be an option for you. For the medications listed in this document, if a step therapy is commonly required, it will generally be noted next to the medication with a dot under the step therapy column. Some plans may have step therapy programs on additional medications beyond those noted in this document. Refer to your benefit plan materials for details about your particular benefits.

**Dispensing Limits (DL):** Drug dispensing limits help encourage medication use as intended by the FDA. Dispensing limits are placed on medications in certain drug categories. For the medications listed in this document, if a dispensing limit applies, it will generally be noted next to the medication with a dot under the dispensing limits column. Limits may include quantity of covered medication per prescription, quantity of covered medication in a given time period, coverage only for members within a certain age range, and coverage only for members of a specific gender. If your doctor prescribes a greater quantity of medication than what the dispensing limit allows, you can still get the medication. However, you will be responsible for the full cost of the prescription beyond what your coverage allows.\*

\*Please note: For certain controlled substance medications, some state laws may not allow coverage by a health benefit plan of such medication if dispensed in a quantity beyond what the dispensing limit allows. You will be responsible for the full cost of the prescription with no benefits applied if the dispensed quantity exceeds the dispensing limit.

**Remember, medication decisions are between you and your doctor.** Only you and your doctor can determine which medication is right for you. Discuss any questions or concerns you have about medications you are taking or are prescribed with your doctor. BCBSNE does not provide health care services and, therefore, cannot guarantee any results or outcomes.

## How to Use This List

Generic drugs are shown in lowercase **boldface** type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand.

Example: **atorvastatin** (Lipitor)

Brand drugs are listed in all CAPITAL letters.

Example: PROAIR HFA

- Preferred Generics are marked with a “p” and shown in lowercase **boldface** type
- Non-preferred Generics are marked with an “np” and shown in lowercase **boldface** type
- Preferred Brands are marked with a “P” and shown in all CAPITAL letters
- Non-preferred Brands are marked with an “NP” and shown in all CAPITAL letters
- Preferred Specialty Drugs are marked with a “P” and shown as lowercase **boldface** type or in all CAPITAL letters. These drugs are also marked with a dot in the Specialty column.
- Non-preferred Specialty Drugs are marked with an “NP” and shown as lowercase **boldface** type or in all CAPITAL letters. These drugs are also marked with a dot in the Specialty column.

Drugs denoted with a “+” and the tier designation in the Prescription Drug List indicate group-specific coverage. Please refer to your benefit booklet for coverage details.

## For More Information

To access a searchable version of the BCBSNE Prescription Drug List, visit **NebraskaBlue.com**. If you have questions about your prescription benefit or how to use this booklet, please call the number on the back of your member ID card.
