

Contraceptive Drugs and Methods Pharmacy List

In August 2011, the U.S. Department of Health and Human Services (HHS) announced guidelines to ensure women receive services for certain contraceptive methods and counseling at no additional cost. The guidelines refer to Federal Drug Administration (FDA)-approved contraceptive methods for all women with reproductive capacity as prescribed.

In keeping with these guidelines, Blue Cross and Blue Shield of Nebraska (BCBSNE) covers certain contraceptive methods and counseling at 100% when members use a BCBSNE in-network provider.

Please note, the list of drugs covered at 100% has been updated and is effective on plan years beginning on or after August 1, 2015. To confirm when this list is effective for your plan, please call our Member Services Department at the number shown on the back of your BCBSNE member ID card.

The contraceptive drugs listed below will be covered at no cost to you. If the item is not on this list, it may still be covered, but will be subject to your plan's normal prescription drug cost share amounts¹.

GENERIC DRUGS

- Aftera^{2,3}
- Alyacen 1/35
- Aubra
- Aviane
- Azurette
